

PGX[®]

Weight Loss Meal Replacement

Double Chocolate

Product Summary

The PGX[®] (PolyGlycopleX[®]) Weight Loss Meal Replacement promotes healthy weight loss by reducing postprandial hyperglycemia, increasing satiety, and providing supportive nutrients for blood sugar metabolism. PGX[®] is a highly-viscous combination of well-purified water-soluble polysaccharides derived from konjac root, sodium alginate, and xanthan gum, which has been shown to reduce postprandial glucose concentrations and lower total and LDL-cholesterol, primarily by forming a gel matrix which slows gastric emptying. Postprandial hyperglycemia is an important causal factor in endothelial dysfunction, several complications of diabetes, and overweight. By reducing the glycemic index of foods, viscous fibres prevent postprandial spikes in blood glucose concentration and in insulin production. They have also been found to increase satiety and reduce appetite, promoting a lower caloric intake, resulting in weight loss.

PGX[®] is combined with whey protein and medium chain triglycerides, shown clinically to enhance body fat loss while preserving lean muscle, and to induce satiety and a decreased consumption of calories, respectively. A full complement of vitamins and minerals ensure support for healthy macronutrient metabolism.

Unique Features

- Contains 5 g of PGX[®] per serving
- A delicious and satisfying meal replacement that curbs appetite and prevents food cravings
- Low glycemic load and index; helps to normalize postprandial blood glucose levels and improves insulin sensitivity for less fat storage
- Suitable for carbohydrate-reduced diets
- Convenient breakfast and/or lunch meal replacement alternative
- No artificial sweeteners or flavors
- Also available in French Vanilla and Very Strawberry

PGX[®]

Weight Loss Meal Replacement
Double Chocolate
1 kg powder
Code: 9206

Scoop size: 33.5 g

Feature: Delicious, all natural flavor

Supplement Facts

Serving Size: 2 scoops (67 g)

Servings per Container: 15

Key Ingredients:

Whey Protein Concentrate (microfiltered, undenatured)..... 32 g
 PGX® (PolyGlycopleX®)..... 5 g

Highly purified fiber complex manufactured using the proprietary EnviroSimplex® process: Konjac-mannan (*Amorphophallus konjac*) (root), Sodium Alginate, Xanthan Gum

Soy Lecithin..... 4.1 g
 Medium Chain Triglycerides..... 2.3 g

Ingredients: Whey protein concentrate (milk) (microfiltered, undenatured), organic cane juice, xylitol, PGX® (PolyGlycopleX®) (konjac-mannan [*Amorphophallus konjac*] [root]), sodium alginate, xanthan gum), soy lecithin, chocolate powder, medium chain triglycerides (coconut), dicalcium phosphate, potassium citrate, magnesium citrate, sodium chloride, calcium citrate, ascorbic acid, zinc citrate, niacinamide, biotin, ferrous fumarate, beta carotene, d-alpha tocopheryl acetate, copper chelate, molybdenum citrate, selenium chelate, manganese citrate, calcium pantothenate, folic acid, thiamin hydrochloride, pyridoxine hydrochloride, riboflavin, cyanocobalamin, potassium iodide, chromium chelate, ergocalciferol.

Contains no artificial preservatives, colours or sweeteners and no wheat or yeast. Sealed for your protection. Do not use if seal is broken. For freshness, store in a cool, dry place.

Suggested Usage: To make a delicious and satisfying smoothie, blend, shake or briskly stir 2 scoops (67 g) of PGX® Weight Loss Meal Replacement into 12–16 fl. oz. of water once daily, or as directed by a health care professional. Drink additional water (12–16 fl. oz.) following the smoothie. When first taking PGX® Weight Loss Meal Replacement, begin with 1 scoop (33.5 g) in a glass of water (6–8 fl. oz.) and gradually increase to 2 scoops (67 g) as directed above.

Serving Option: You can also customize your drink mix by blending PGX® Weight Loss Meal Replacement with purified water and 1 cup of fresh or frozen organic berries or other fruit. PGX® Weight Loss Meal Replacement makes a delicious pudding. Mix as above, then pour into a bowl and refrigerate for 1 hour. Add ½ a banana or other fruit for variety.

Notice: A small percentage of people may initially experience minor, temporary digestive changes as the body adjusts to the addition of PGX®, usually in a few days. To help ease fiber digestion, slowly work up to the full dose. It is important to drink adequate amounts of water immediately after ingesting PGX®.

Contraindication: Those with a known allergy to any of the components should avoid it. Individuals at risk for intestinal obstruction, such as those with systemic sclerosis, should increase fiber intake with caution. While no specific contraindication exists or is predicted, data is lacking for use during pregnancy, lactation, and in children, and the dosage may need to be reduced for those less than 18.

Drug Interactions: A reduction in serum glucose concentrations may require a lowering of the dosage of any antidiabetic medications, and serum glucose should be monitored closely to prevent hypoglycemia. Oral medications may need to be taken one hour prior or two hours after, to prevent a reduction in their absorption. Similarly, fat-soluble vitamins should be taken separately. Theoretically, whey protein may decrease levodopa absorption, and should be taken together with caution.
